

Thinfilm is the global leader in the development and commercialization of printed electronic smart systems.

We print electronics, allowing us to produce ultra-high volume at low unit-costs—a unique combination of scale and affordability.

Today, Thinfilm is delivering on its mission to make everyday objects just smart enough. In doing so, we are extending the boundaries of the Internet of Things and helping to create a truly connected world.

Our Products

NFC SOLUTIONS
Enhanced product security and rich consumer engagement – all in one smartphone-readable label.

Learn More

Valid Smart LABELS
Cost-effective safety and reliability for temperature -sensitive shipments.

Learn More

FLEXTRONICS · xerox · nedap · DIAGEO · TEMPTIME

THINFILM

Our vision is to bring electronics to even the most cost-sentitive applications. We make electronics through a fundamentally new process, printing rather than semiconductor fabrication.
